

Imagine...a world where water is viewed, managed and valued as one resource, a world where diverse interests work together as one to meet future challenges on a watershed basis with a focus on sustainability and green cities — this is the **vision** of the Clean Water America Alliance.

With a population of more than 300 million, an aging industrial base, a resource-intensive farming system and a network of sprawling cities, today's America faces daunting water challenges that call for a new approach. The thinking of the past needs to change. No longer can we afford to look at drinking water, wastewater and stormwater challenges in segregated management silos. No longer can we afford to look at water issues outside the context of sustainable cities and climate change. To secure a sustainable future for coming generations, we need a more comprehensive approach, and an integrated, holistic water policy.

The Clean Water America Alliance (CWAA) is dedicated to working with individuals, organizations and entities throughout the country — both public and private — to forge a new vision for a sustainable water future. We invite you to join us in exploring and analyzing the critical issues, providing meaningful information to citizens and policymakers, and recognizing organizations and individuals for outstanding innovation and achievements. Let's work together to "make water one," to achieve an integrated, holistic water policy that will sustain generations of Americans to come.

This is a watershed moment. Make sure you're part of it!

CWAA Board of Directors:

Jack Baylis
AECOM

D. Randall Benn
Dewey & LeBoeuf LLP

Dick Champion, Jr.
Independence Water Pollution Control Department

Julius Ciaccia
Northeast Ohio Regional Sewer District

James H. Clark
Black & Veatch Corporation

Carol Collier
Delaware River Basin Commission

Michael B. Cook
U.S. EPA (Retired)

Mohamed Dahab
University of Nebraska – Lincoln

Alexandra Dapolito Dunn
Pace University School of Law

Richard C. Fox
Camp Dresser & McKee, Inc.

Benjamin H. Grumbles
Arizona Department of Environmental Quality

James Hall
Siemens Water Technologies Corporation

John Hattle
Skender Construction

Patrick T. Karney
CH2M HILL

Dick Lanyon
Metropolitan Water Reclamation
District of Greater Chicago

Charles Logue
Clean Water Services

Vernon Lucy
Inflico Degremont
